

Expanding Access for All Students

Whether students are thinking about attending a two- or four-year college, are interested in career options, or aren't sure what they want to do after high school, they'll find that the SAT® is an important tool they can leverage to help plan their next step.

PRACTICE AND PREPARATION

Available for all students are tips on how to study for the SAT using full-length practice tests on **Bluebook™**, downloadable forms if approved to test on paper, and **Official Digital SAT Prep** on Khan Academy®.

EXPANDS ACCESS

Income-eligible 11th- and 12th-grade students have access to **SAT fee waivers, unlimited SAT score sends, and college application fee waivers**, so they can take the SAT and apply to college—**for free**.

SAT SCHOOL DAY

SAT School Day **removes barriers** students may face to weekend testing and provides them access to **personalized career insights, customized college guidance, and scholarships**. More than 7 million students in nearly 5,000 districts and more than 14,000 schools have participated in SAT School Day.

DEMONSTRATES STRENGTHS

When viewed within the context of where a student lives and learns, test scores can confirm a student's grades or demonstrate their strengths **beyond what their high school grades may show**.

A SIMPLER TESTING EXPERIENCE

The digital SAT provides a shorter test, with more time per question, and an overall streamlined testing experience for students and educators.

More than 1.97 million students in the high school class of 2024 took the SAT at least once, up from 1.91 million in the class of 2023.

"I thought that it was an easier process than the paper SAT. It took less stamina and since there was a timer right in front of you, I thought that was very useful. I felt that it was less stressful. This format allowed me enough time to get through each section and feel confident in my answers."

—Emily, Student in New Jersey
